COMPSCI 342: Data Structures and Algorithms
Homework 2 (15 points), Due Date: 11th February

- Examine the Java source code for `java.util.Arrays` class and report on what sorting algorithms were used for sorting an array of integers, an array of `Objects` and and an array of type `T`.

  On `onyx`, the java source code can be found in the folder: `/usr/local/java/src`. You can also download the source code from the Java website directly for your own computer.
